

▶ Dog Import Requirements Into the US

Canada is considered a 'low-risk' and 'rabies-free' country. Any dog entering the US after having been in Canada within the last six months for any reason must meet the above requirements. Dogs that have been in 'high-risk' rabies countries must meet additional requirements. More information is available at pcbusa.com/services/import-dog-cat-into-us.

		Been in a high-risk country for rabies within six months		Dogs having been in a dog rabies-free or low-risk country within six months				
		Originated in The US	Not Originating in The US	Originated in The US	Not Originating in The US
